

One dossier. The entire relocation.

Moving, destination services and immigration in one connected platform — from the first enquiry to the final invoice.

THE CHALLENGE

A single relocation passes through sales, surveys, quotes, suppliers, field crews, paperwork and billing. When every step lives in a different tool, teams retype data, lose visibility at each hand-off and invoice late or incorrectly.

THE PLATFORM

Relo One keeps one customer file from request to accepted quote, scheduled work, proof of delivery and invoicing. Activate only the modules you need; every company's data stays separate and role-protected.

01

Moving & field

Fast inventory and volume estimates, editable quotes, day-by-day crew and vehicle planning, driver proof of delivery and live customer tracking.

02

DSP & immigration

Destination-service and immigration files that open from the accepted quote, with checklists, handovers, renewal reminders and HR approvals.

03

Finance & control

Invoices split between company and employee or agent and client, multi-currency, with clear margins per job and per department.

Built-in AI where the work happens. Relo One reads documents, drafts offers and follow-ups and flags what needs attention — your team stays in control and approves before anything is sent.

What changes for your team

- **Less retyping** One combined quote opens the moving, DSP and immigration files automatically.
- **Faster quotes** Enquiries from customers and partners arrive as quote-ready drafts.
- **Fewer surprises** Missing documents, unbilled extras and date conflicts are flagged early.
- **Correct billing** Each line is billed once, to the right party, with no double invoicing.
- **Happier customers** Secure portals for signing, photos, documents and move tracking.
- **Ready for cross-border** Destination paperwork guidance and industry-standard condition reporting.

BUILT FOR

Moving companies, destination-service providers, immigration specialists and integrated relocation teams across Europe and internationally — from growing local operators to multi-country networks.

SECURITY & GOVERNANCE

Separate workspaces per company, role-based access for office, field and finance teams, audit trail on key records and EU hosting aligned with GDPR.

HOW TO START

Start with one workflow and expand across the same customer file. Pricing is modular and tailored to your service mix and team size — confirmed after a short demo.

Book a 20-minute tailored demo

Bring your current workflow — we map Relo One to your operation, from enquiry to invoice.
